

TO: Missouri Local Public Health Agencies, Missouri Influenza Sentinel Physicians

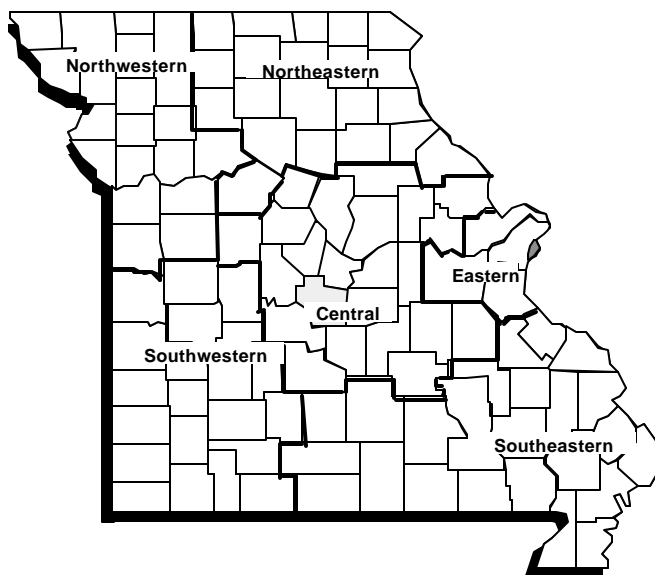

FROM: Howard Pue, D.V.M., M.S., Chief
Section of Communicable Disease Control and Veterinary Public Health

SUBJECT: Weekly Missouri Influenza Report 2001-2002 Season
(All data in this report are provisional and may change as reports are updated.)

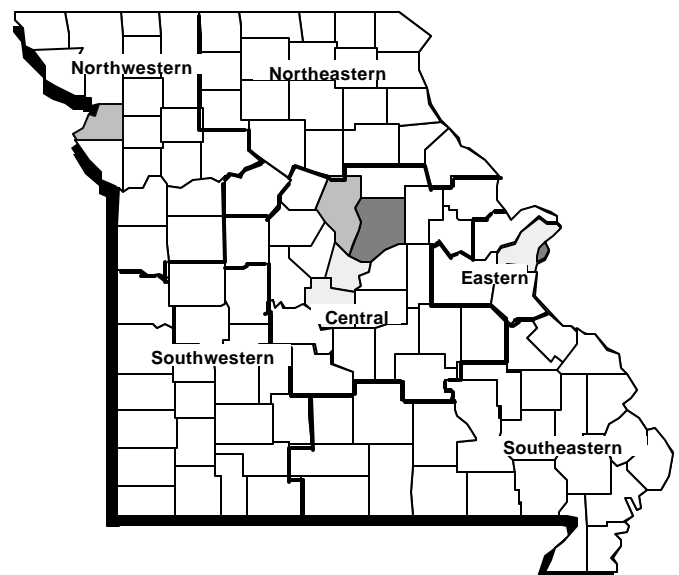

Missouri is reporting "sporadic" influenza activity to the Centers for Disease Control and Prevention.

Week: 48	For the Week Ending: December 1, 2001					
Reported Laboratory Confirmed Cases This season's subtypes:	A (non-typed)	A (H3N2)	A (H1N1)	B	A or B untyped (rapid test)	Total
Week:	1	0	0	1	0	2
Season-to-Date Totals*	19	0	0	2	4	25

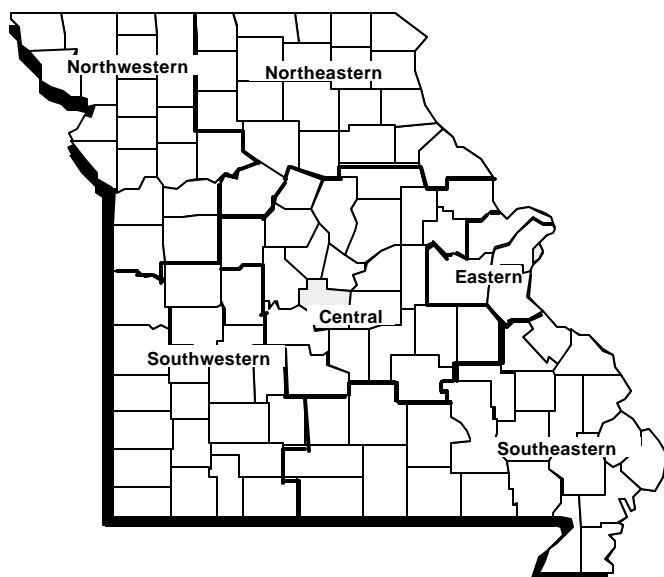

Confirmed Influenza, Type A, B, or A/B Undifferentiated
Missouri, By Health District
Week 48, Ending December 1, 2001

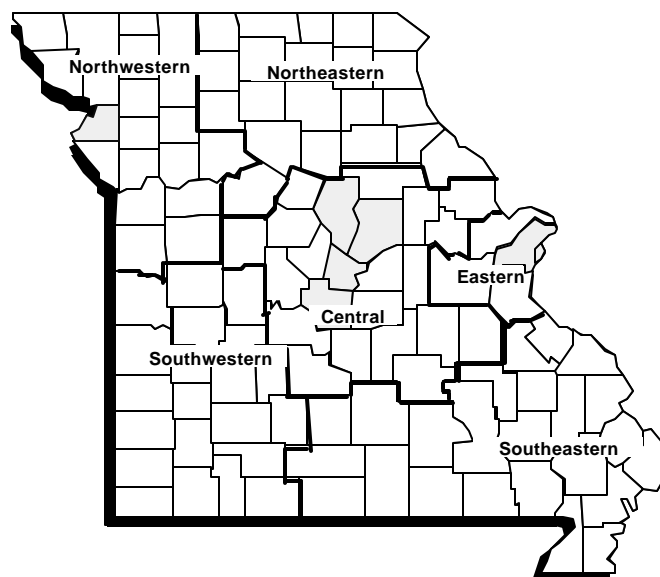

Confirmed Influenza, Type A, B, or A/B Undifferentiated
Missouri, By Health District
Season-to-Date, Ending December 1, 2001

Confirmed Influenza, All Types
Missouri, By Health District
Week 48, Ending December 1, 2001

Confirmed Influenza, All Types
Missouri, By Health District
Season-to-Date, Ending December 1, 2001

Week: 48			For the Week Ending: December 1, 2001					
Clusters/Outbreaks of Influenza-Like Illness								
Health District	Central	Eastern	NE	NW	SE	SW	YTD	Last Season YTD
School Closings							0	0
Community Outbreaks							0	0
LTC Facility Outbreaks							0	1
Other Outbreaks							0	0

Week: 47	For the Week Ending: November 24, 2001			
	Season-to-date	Week 47	Week 47 Last Season*	10 Year Median
Pneumonia & Influenza Deaths	213	9	26	27

Week: 48		For the Week Ending: December 1, 2001			
U.S. Influenza Sentinel Physicians Surveillance Network	Age 0-4	Age 5-24	Age 25-64	Age 65+	Total Patients Seen
Influenza-like illness for week	3	18	21	5	4171

Recent implementation of the new High Alert Surveillance System (HASS) has replaced the Sentinel Active Surveillance System (SASS) reporting method for influenza-like illness in some counties. The Active Surveillance Table illustrating influenza-like illness and pneumonia-like illness has been removed from this report. Future inclusion of HASS respiratory illness data is under consideration.

Sources of Data: Laboratory confirmed cases are reported to the MDHSS passive communicable disease surveillance system through the disease registry. Suspected influenza clusters and outbreaks are reported through the active surveillance system. Pneumonia and influenza deaths are reported through the MDHSS, Bureau of Vital Records. Influenza-like illness data by age category and total number of patient visits by week are reported voluntarily by participants in the U.S. Influenza Sentinel Physicians Surveillance Network.

*The influenza season begins with week 40 (week ending October 6, 2001) and ends with week 20 (week ending May 18, 2002). The influenza season for previous years extended from week 46 through week 17. Therefore, the 10-year median is from week 46 through week 17 only.

The following information may also be found on the Missouri Department of Health and Senior Services (DHSS) Homepage at www.dhss.state.mo.us at Diseases & Conditions. National influenza surveillance information is available from the Centers for Disease Control and Prevention at www.cdc.gov/ncidod/diseases/flu/weekly.htm.

The Missouri Department of Health and Senior Services after hours emergency number is (573) 751-4674.
